

GEOGRAPHY

You must have five grade 5s and above including grade 5 in English to be able to study the course.

Reasons to study the course:

- Living sustainably is the key to our future as a human race and understanding the Earth's systems and our involvement with them will help you in careers and life.
- The transferable skills that you will obtain from Geography like processing data, presentation skills, analysis, fieldwork investigations, empathy, problem solving and logical thought will be essential in your future careers.
- You will be able to develop a Global perspective on world issues.

BISHOP ULLATHORNE CATHOLIC SCHOOL

WHAT WILL I STUDY:

Globalisation: This will focus how the world is much more accessible to us as a global community and how we engage with the world including the consequences that this can have.

Coasts: A very pertinent module for us living on an Island, looking at the physical and human interactions and how we can 'future proof' our nation.

Tectonics: This will look at the origins of tectonics and the hazards associated with it, you will also look at how we can try to reduce the risk of disasters and how successful these can be.

Rebranding: A look at how Rural and Urban areas in various countries can re-invent themselves to become more successful, if you like shopping in the Bull ring in Birmingham than this is the module for you.

Water and Carbon cycling: Studying our precious resources and how we use them is our key to future sustainability, this module will make you think critically about how a range of countries use their natural resources and the conflicts it can create.

Superpowers: You will look at the economic rise of some nations and the impacts this is having on the rest of the world.

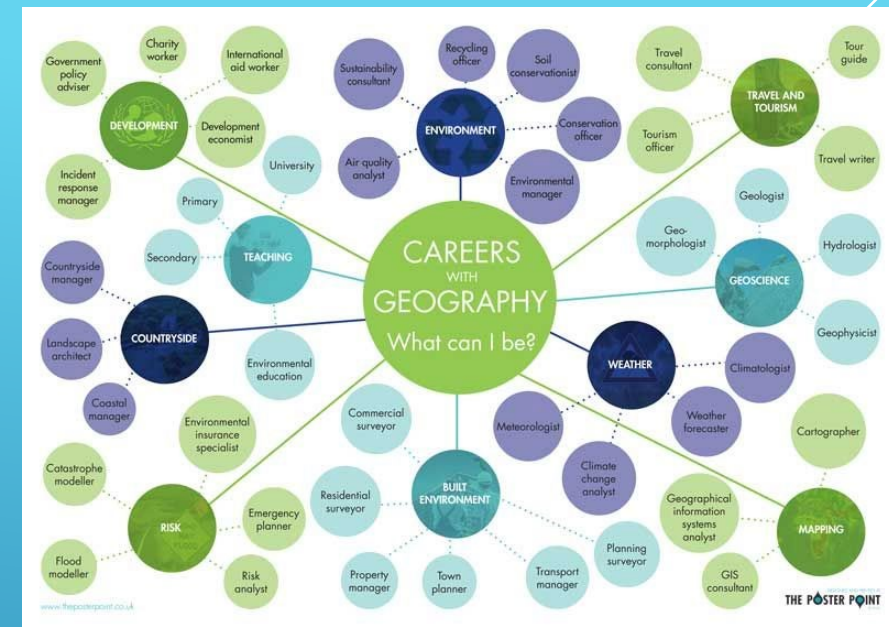

Health Human rights and interventions: This module shows that the world is unfair, it will look at who is to blame and also what can be done to improve our global community.

CAREER OPPORTUNITIES

Due to the Global nature of Geography and it's focus on impacts on the human and physical environment, Geographers go into a wide range of jobs:

Estate manager

Travel agent

Flood protection officer

Chartered Surveyor

Town planner

Transport manager

Data analystist

Diplomat

Risk assessor

Geologist
